

Solutions

5.0MP HD Camera

Excellent HD resolution allowing the user to interface with our software solutions to take snapshots, record videos, stream live images to a device, and much, much more.

Quick Turn Focus

Quick Manual focus in 1/4 turn allows the user to have ultimate control over the subject matter...from extreme close-up to infinity in a 1/4 turn of the knob. This quick focus allows the teacher and student to quickly focus on what is important, saving class time and maintaining attention on the content. Easier presentations with no downtime and no set-up required. With Plug-and-Play connectivity, access all of your digital content and create new digital content.

Durability

Rugged body with a heat/chemical resistant polycarbonate construction and flexible neck. The combination allows Ken-A-Vision to offer a lifetime warranty on its parts and workmanship for the Video Flex HD. The tall robust 25 inch neck extends to expand the work area without the concern of sagging or springing. A simple microscope coupler fits most microscopes. And for those microscopes that it doesn't fit, Ken-A-Vision will build an adapter to fit your microscope.

EduCam App - This digital microscope works seamlessly with our software solutions allowing all users to stream live images to a multitude of platform devices.
