Solutions

Connection Options

USB and analog connections make this series versatile for any setting. Compatible with televisions, projectors, and computers, the Video Flex offers a simple, easy-to-use solution in making small things big for classroom viewing.

Quick Turn Focus

Quick Manual focus in 1/4 turn allows the user to have ultimate control over the subject matter...from extreme close-up to infinity in a 1/4 turn of the knob. This quick focus allows the teacher and student to quickly focus on what is important, saving class time and maintaining attention on the content. Easier presentations with no downtime and no set-up required.

Durability

Rugged body and flexible neck with a heat/chemical resistant polycarbonate construction, the Video Flex has a proven track record to last. Its 5 year warranty is testament to longevity in any classroom.

EduCam App

The 7660 model works seamlessly with our software solution allowing all users to stream live images to a multitude platform of devices.
