Network Memory Scope

T-1955

Ken-A-Vision® introduces the Network Scope. This revolutionary microscope allows the individual student to take up to 30 images without a computer. Using the Network Scope's touch panel and attached LCD monitor, live images may be viewed, or screen split to view 1 live/1 saved image, or quad screen to view 1 live, 3 saved images. Microscope can also be networked with any combination of up to 15 other microscopes or Ken-A-Vision cameras, and the image of all 16 monitored by the teacher using included Ken-A-Vision Network Software. Software is included with the purchase of 4 or more Network Scopes. Images may be downloaded to a computer using the USB port, or captured by the instructor using the Network Software. Microscope can be connected to a TV, computer or a network so it may be viewed by an audience or images seen remotely in other locations. The Network microscope has the quality construction and service you have come to expect from Ken-A-Vision.

Additional Features and Benefits

- LCD Screen
 - Touch Keypad
 - Internal Memory Chip
 - Multiple Connections
- View captured & live images
Compare captured stills
Access menu
Record & playback movies
Capture & view stills
Create split screen views
Save data without being connected to a computer
RJ-45 - Network, USB - Digital, & RCA - Composite Video
