Cordless Dual Purpose Comparison Scope T-1924C

The Comparison Microscope by Ken-A-Vision[®] is the perfect classroom tool for teaching forensics or any comparative science. It allows side-by-side comparisons of two slides as well as the ability to view each slide individually. The high-quality optics, and precision mechanics to provide a safe and flexible value.

Features and Benefits

- Side-by-side comparisons of “evidence”
- Separate top lighting for viewing macro or opaque specimens
- Bottom stage lighting for standard microscope slides
- Floating x/y stage
- Each microscope focuses independently
- Object or microscope slide on each side can be viewed in a full field independently OR together in a split screen
- Rechargeable batteries
